

# DAMO GUARD

Rack Column Protector

## RACK GUARDS

These pallet rack guards are designed to prevent damage to storage systems. They are proven to be an efficient and inexpensive way of protecting the lower portion of rack uprights, where over 85% of damage occurs.

The DAMO GUARD reduces impact stress on the rack column by up to **9 times**.

Prevents future rack maintenance costs by strengthening and protecting the front rack column.

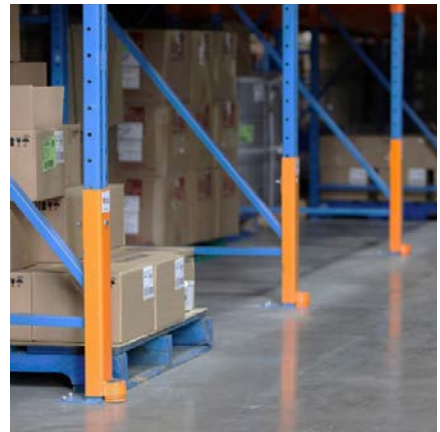

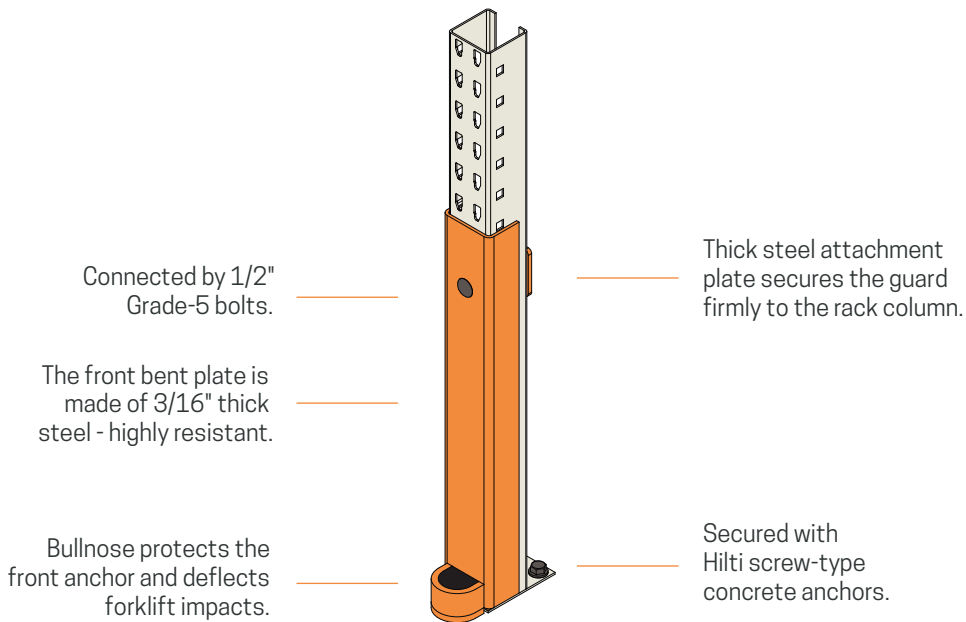

Quick installation in under 15 minutes.

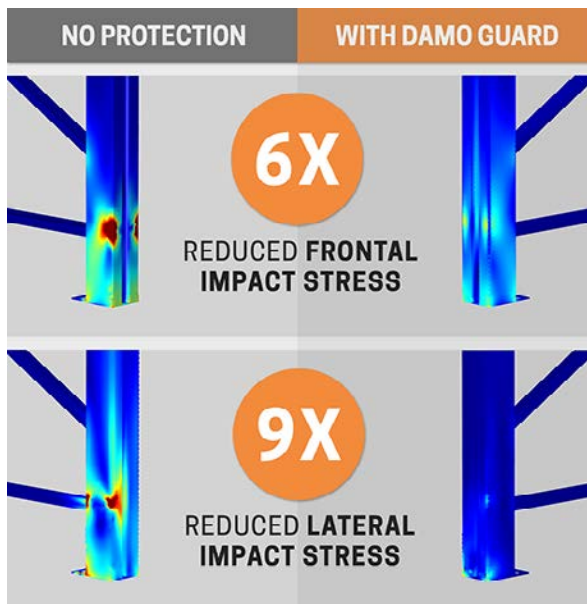

Fits on front column of any rack upright. Available in various dimensions.

# DAMO GUARD

The DAMO GUARD can be adapted to various column sizes.

An impact study performed on an upright column showed that the DAMO GUARD decreases the stress on the original column by a factor of 6 on the front and by a factor of 9 on the sides.
