24/7 Security

Original Wire Mesh Partition Warehouse Storage

On the job 24/7. Create secure, reliable and functional storage space exactly where you need it with Cogan original wire mesh partitions.

By creating a safe storage room within your existing warehouse, Cogan original wire mesh

partitions are the economical and reliable solution for safeguarding valuable inventory and equipment. The modular nut-and-bolt design and large inventory of in-stock panels allow you to set up a freestanding storage enclosure quickly using standard hand tools. The all-steel construction and powder-coated paint finish resist wear and require no maintenance. Standard or custom, you always get a superior quality product that is delivered fast.

Robotic Guards

Robotic Equipment Protection

Protect your employees when operating or working near robotics equipment with Cogan robotic machine guards.

Cogan robotic machine guards protect your personnel and equipment from accidents associated with moving machinery. Ideally suited for guarding robotic and automated equipment, our modular machine guards are engineered to help you set up a protected area quickly and easily. Cogan robotic machine guards boast a sturdy, all-steel construction, are wear-resistant and maintenance-free. Available in our powder-coated midnight black and safety yellow paint finish.

Rigid and resilient, form a sturdy wall of protection between your employees and your inventory with Cogan wire mesh rack guards.

Rigid and resilient, Cogan rack guard panels bolt directly onto pallet uprights, keeping your

employees safe from any falling debris—should a forklift or other in-plant vehicle accidentally bump the pallet. The wire mesh construction forms a sturdy wall of protection for your employees, while your inventory remains secure and visible. Simple nut-and-bolt assembly makes installation quick and easy, minimizing costs and maximizing savings. It's why Cogan rack guards consistently outperform in every crucial area—including price.

Rack Guards

Back-of-Rack Protection

Sheet Metal

Welding Cell Partition

Segregate automated machinery, enclose welding areas and guard robotics equipment with Cogan sheet metal partitions.

Keep your employees safe from moving machinery, robotics equipment and welding zones with Cogan sheet metal partitions. Our sheet metal partitions offer the same trusted protection as our wire mesh enclosures, but with the added benefit of complete privacy. Made from heavy-duty corrugated steel panels framed in 1 ¼" x 1 ¼" x 12GA structural angle, sheet metal partitions are an excellent way to divide and secure large areas in your plant, warehouse or office building.

Sheet Metal/Lexan Workspace Division Partition

Total privacy or complete transparency. Create safe and versatile workspace with sheet metal and Lexan partitions.

If privacy or noise reduction is required between work stations, Cogan sheet metal partitions fitted with Lexan panels are an ideal solution. These highly durable, transparent sheets provide added security while still maintaining an open field of vision. Your facility will remain in clear view and your employees kept safe. You can incorporate Lexan panels in your design on the top half of the partition only, or along the full-height of the partition for total transparency.

Cogan products are built to last
Our promise is for life

Rack Gates

Racking Security

Security should never be optional. Protect valuable inventory, prevent theft and contain pallet spills with Cogan sliding rack gates.

Cogan sliding rack gates are the custom solution for securing your racking units without limiting

accessibility. Mounted on galvanized steel top track with heavy-duty galvanized trolleys, our rack gates are built strong for industrial applications. The fully-suspended design allows for easy forklift and pallet jack access. Rack gates are framed in structural angle and reinforced with tubing on both sides for superior rigidity. Use rack gates to safeguard inventory in sensitive racking areas or to divide merchandise sections in your warehouse.

Drug Storage

DEA Security Cage

Cogan drug storage cages provide the tamper-proof protection you need to keep dangerous substances out of reach.

Limit narcotics access and secure evidence with Cogan drug storage cages. Ideally suited for pharmacies, pharmaceutical companies, medical facilities, records storage, and more, Cogan drug storage cages meet both US and Canadian physical security requirements for the safe storage of controlled substances. Cogan has provided DEA cage partitions to the world's top pharmaceutical companies such as Abbott, Pfizer, Novartis, Merck, Schering-Plough and GlaxoSmithKline.

Around the clock security. Keep private files, company records, and other sensitive documents on-site with Cogan wire mesh partitions.

Even in today's digital world, the safe storage of hardcopy documents is important and

necessary. Keep private files, company records, and other sensitive documents on-site with Cogan original wire mesh partitions. By creating a secure archive area within your existing facility, our partitions allow you to store overflow documents nearby for immediate access and constant supervision. Our team of experts can help you configure your archive room any way you want. Cogan partitions can be built alongside existing structures or as fully-enclosed rooms.

Original Wire Mesh Partition Archival Document Security

Machine Guard

Industrial Partition

Heavy-duty protection to keep your process running smoothly. Install a Cogan machine guard partition and put an end to preventable injuries.

Cogan machine guard partitions offer protection against occupational hazards associated with

industrial manufacturing. Moving machine parts, robotics and other mechanical equipment have the potential to inflict serious harm on your employees. Install Cogan machine guards and put an end to preventable injuries. Built from heavy-duty 2" x 1" x 10GA framed welded wire mesh, our machine guards create a secure barrier between your workers and your equipment. The ultra-resilient design means machine guards are strong enough to withstand forklift collisions.

Machine Guard

Work & Test Area Partition

Secure hazardous work zones and high-temperature test areas with a sheet metal & Lexan machine guard partition.

Keep volatile or high-pressure work and test areas safely enclosed with a sheet metal and Lexan machine guard partition. Sturdy corrugated steel sheets help to contain sparks, spray and other spatter, while Lexan panels allow for clear visibility and light penetration. Special 4" sweep provides extra clearance for moving parts and electrical wires. Optional mezzanine integration creates a load bearing roof for any equipment that must be accessed from above the work area.

Secure and separate conveyor systems and moving machinery from warehouse traffic with Cogan conveyor machine guards.

In today's world, where automation has become essential to manufacturing and distribution, the

need for proper safeguarding is more important than ever before. Cogan conveyor machine guards serve to separate conveyors and other moving machinery from warehouse traffic. The fully-framed partition system allows access to equipment only where necessary. This creates clearly defined work areas and safe walkways for pedestrians circulation. Available in our midnight black and safety yellow powder-coated paint finish for maximum visibility and wear-resistance.
